

Usage regulations

Preliminary information

As an initiative of the Global Research Alliance, the Association Française de Zootechnie (hereafter referred to as “AFZ”) in collaboration with the New-Zealand Agricultural GreenHouse Gas Research Centre (NZAGRC) has worked to collect, validate, store, and disseminate data (hereafter referred to as “the Data”) on the chemical and nutritional value of feeds used for livestock feeding in ASEAN and African countries, with the purpose of using these data for the calculation of environmental values. The Data are provided as Microsoft Excel files, with each file corresponding to a country.

The Data are made available exclusively on the basis of the usage regulations presented in this document.

General access conditions

1. Who can apply?

AFZ makes the Data available to individual users (hereafter referred to as “the User”) working for academic organisations. However, individuals from non-academic organisations can apply for access for projects of academic and scientific nature. Access will be granted on a case-by-case basis.

AFZ will provide the User with an identifier and a password to access the Data on Feedipedia website. The User will be responsible for ensuring via technical and organizational measures that only they can access the Data.

Dissemination of the Data by the User will be limited to the people involved in the same academic project as the User in their organisation, including co-workers and students. Dissemination to third parties outside this perimeter is not permitted.

2. Obligations

If the User authors a publication using the Data, the user will cite the source as follows:

AFZ-NZAGRC, 2022. Feed data for African and ASEAN countries, AFZ, Paris, France.
<https://www.feedipedia.org/node/27625>, 3 October 2022

The User will send a copy of the publication to AFZ in electronic form (PDF) within a month of publication at the latest.

3. Breach of usage regulation

In the event of a breach of usage regulation, the User will be instructed to take corrective measures, including:

- Adding a citation to published material if the citation was lacking
- Ensuring that unauthorized third parties no longer have access to the Data

Lack of compliance from the User will result in the termination of their right to use the Data. If the breach was found to have damaging consequences on AFZ activities, AFZ will consider seeking legal remedies, including monetary compensation.

4. Warranty and liability of AFZ

AFZ is not liable to the User for loss or damages, of any kind, in connection with the Data. The User herewith acknowledges that they are solely responsible for the outcome of measures resultant of the Data or as a consequence of their interpretation of the Data.

5. Charges for data provision

The Data are provided free of charge to users working for academic organizations and using the Data for non-commercial projects. Other types of use of the Data will be subject to agreement with AFZ.

Signature and date :

I,, have read the terms of use hereabove and I accept the usage regulations.
